## ESPR survey “Experiences in research vs. clinical work in pediatric radiology”

---

<https://forms.gle/CM7d3QWPhuNCALi48>

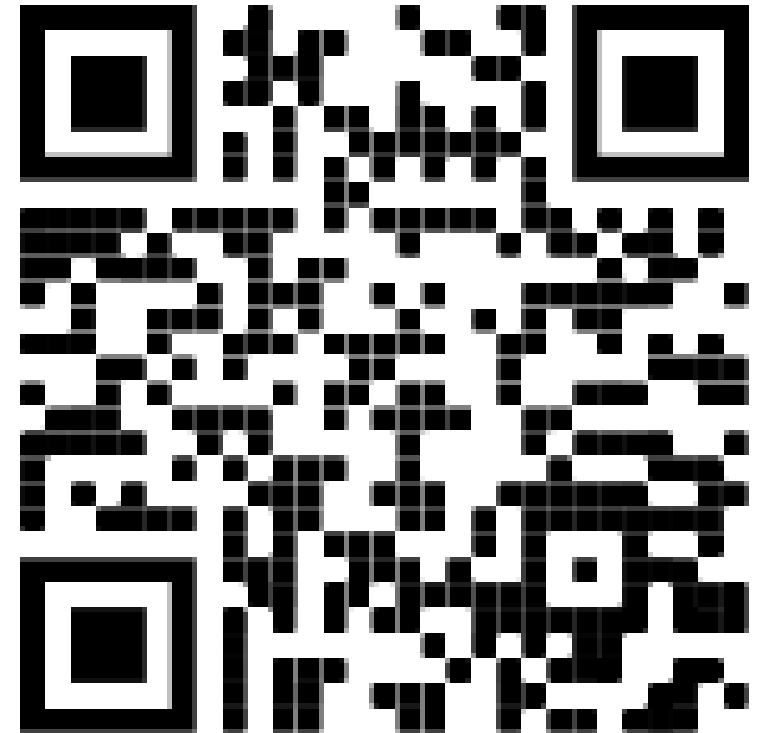

Dear colleagues,

Academic radiology, particularly in paediatric radiology, is an important endeavour and one the ESPR seeks to promote. We understand that there are sometimes difficulties for paediatric radiologists (with an academic degree and research interest) who wish to pursue these interests alongside their clinical work eg in their job planning, when being recruited to jobs etc

To get a better overview about this important topic and to identify problems and solutions, we need your help! Please answer our short survey. This is intended for both those with academic interests and heads of departments

It will be analysed anonymously and we guarantee, that we don't give away your answers together with your name.

Karen Rosendahl, ESPR president  
Susan Shelmerdine, ESPR Education Committee  
Julian Jürgens, ESPR junior representative

## Advantages for members

---

- Reduced fees at ESPR and ECPR
- Access Pediatric radiology
- Webinar recordings
- Form the society with you ideas

***Reduced membership fee for residents***
